

K. M. Marks

NOAA Laboratory for Satellite Altimetry, College Park, Maryland, USA

Download from: <http://www.gebco.net>

At the GEBCO 25th meeting of the Technical Sub-Committee on Ocean Mapping (TSCOM) in September, 2009, a “Cookbook Working Group” was formed to write a “cookbook” to nurture and guide nascent regional mapping projects.

- The cookbook became the “IHO-IOC GEBCO Cook Book”
- Step-by-step manual enables users to prepare and grid data for inclusion in GEBCO bathymetry products
- Contributors are scientific experts from international research organizations, universities, governments, and companies
- The Cook Book is a “living document-” as new contributions come in, it is updated electronically
- The Cook Book is freely available via the GEBCO website (www.gebco.net)

- Published as:
IHO Publication B-11 (April, 2012)
IOC Manuals and Guides, 63 (Oct. 2012)
- EOS “News Brief” announcing Cook Book was published in EOS Trans. AGU, v. 94 No. 9, 26 Feb. 2013, pg. 86
- Article in Hydro International (April, 2014) highlights Cook Book
- Citation established:
International Hydrographic Organization, Intergovernmental Oceanographic Commission, The IHO-IOC GEBCO Cook Book, IHO Publication B-11, Monaco, Sept. 2014, 331pp - IOC Manuals and Guides 63, France, Sept. 2014, 331pp.
- GEBCO website lists an “Update History” so users can learn what has changed in update
- The Cook Book is composed of three main sections- Gridding Examples, Fundamentals, and Advanced Topics, and is currently 475 pages long

Highlighted in Hydro International article
